

## Recycling in Motion

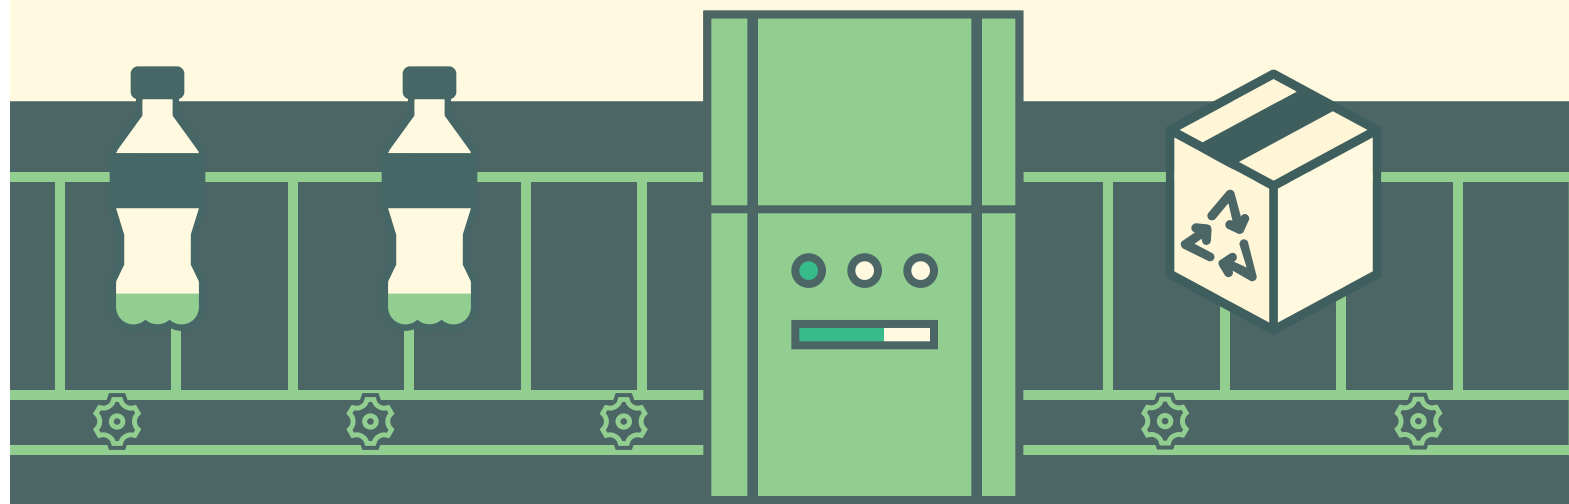

Our comprehensive and sophisticated system of recovery is ever-growing and advancing.

The paper and paper-based packaging industry is committed to getting more fiber back to make more paper. Recycling is key to this efficient sustainability cycle. Learn about why paper and paper-based packaging are some of the most recycled materials in America.

Did you know?  
Only 5% of plastic is recycled.

Source: WSI

Source: AF&PA

Whereas in 2021,  
68% of paper and paper packaging was recycled.

On top of that, paper fibers can be recycled up to 7 times.

Source: EPA 2012

That's why with \$5 billion invested in recycling infrastructure through 2024, we're working to get more fiber back by recapturing more boxes, like pizza boxes, to make more products.
